

EMS Dual Radio System

US-67D Intercom

SE-485 Slotted ear cup headset models are available for the driver when monitoring outside communications is desired.

Belt PTT Headset Extension Cable

A Belt PTT Headset Extension Cable may be used in place of the headset jack and PTT boxes. The extra mobility allows greater freedom of movement in the back of the vehicle while continuing to operate the mobile radio and maintain intercom communication.

SE-18 One ear cup headset models are available for the medic when monitoring outside communications is desired.

This example is for an EMS system installation using a US-67D UltraSound Intercom, Mobile Radio Y-Adapter (if necessary), and accessories. This system will support up to 6 headset positions with 3 of the positions having transmit capability on two radios.

US-67D UltraSound Intercom

- Dual Radio
- Up to 6 Headset Positions
- 3 Radio Transmit Positions

Headsets

- Single Ear Cup, Flex Mic Boom: **SE-18**
