Sigtronics Wireless Headset System

Easy Upgrade

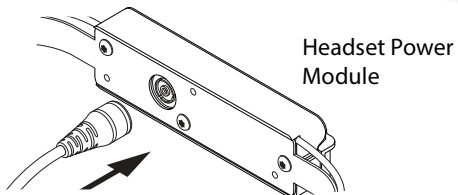

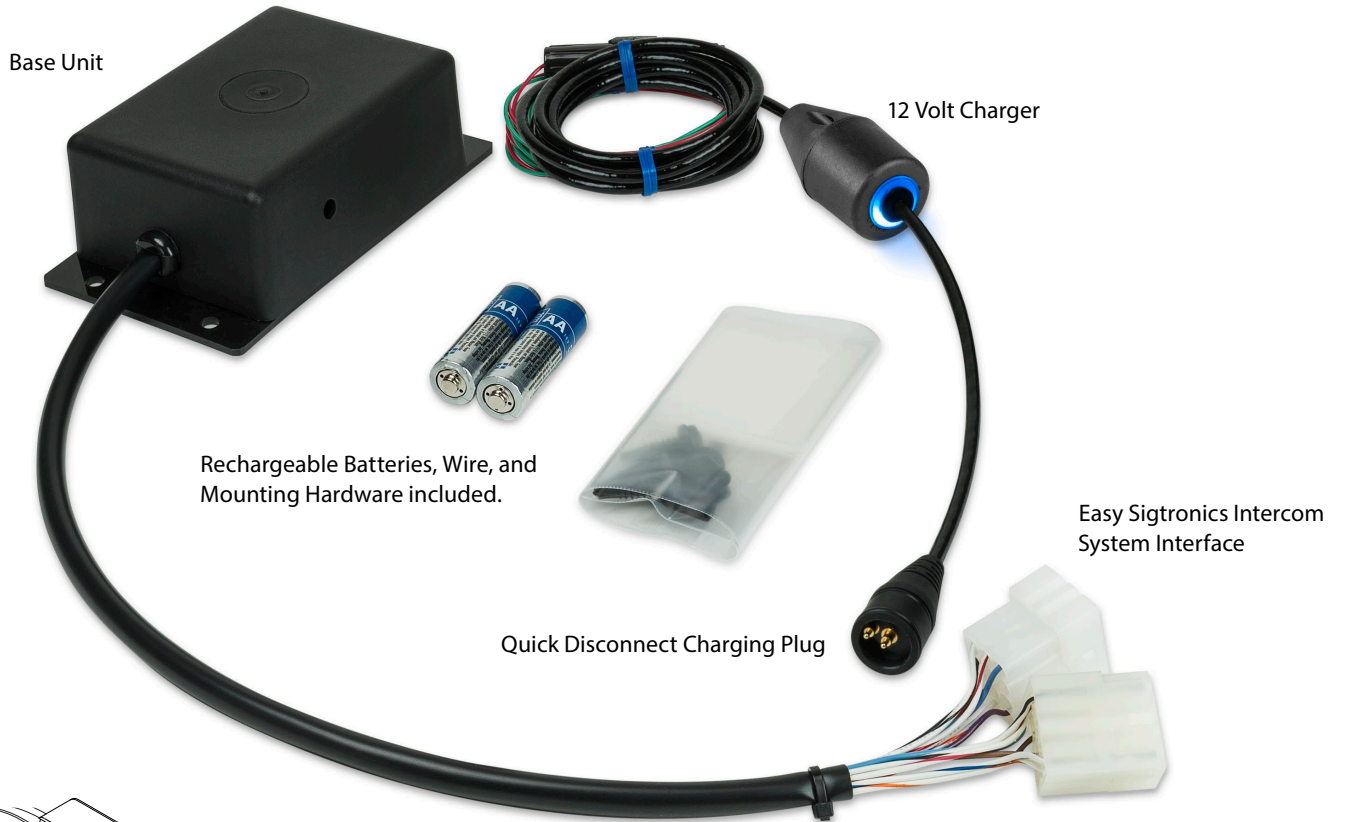

The SWS wireless system does not require removal of the existing Sigtronics intercom installation. Each base unit and its wiring harness is made for a specific Sigtronics intercom model – US-45, US-67, US-12, or MRIM-2. This allows for easy installation, just plug the base unit in-line with the existing intercom wiring harness.

Small Size

You will only need a 5" x 3" x 2" space for the base unit. The charger is only 2" long and can be placed near the wireless headset.

Each SWS wireless system comes complete with headset, base unit, charger, mounting hardware, and wiring harness.

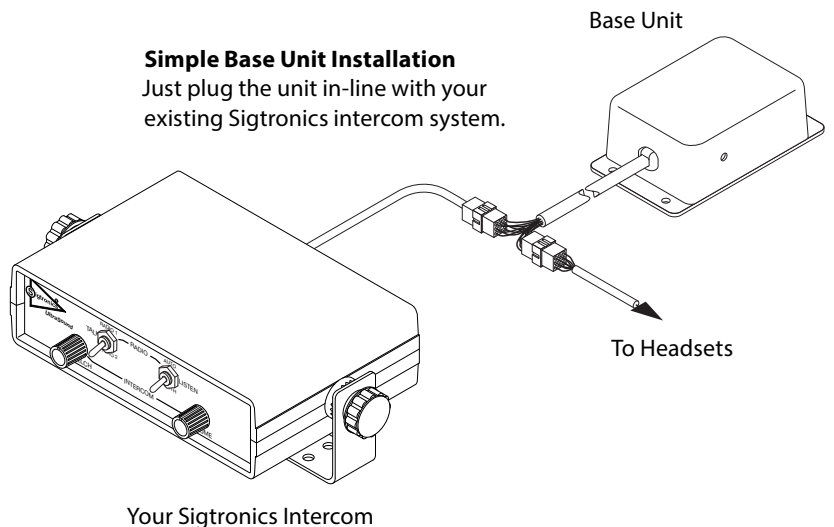

Call for more information and your nearest Sigtronics dealer.

Quick Disconnect Charging Plug
Recharge the headset batteries without removing them from the power module.

Charging Verification
Always know the batterie status. The end of the Charger changes color to show the batteries charge.
